

# Cure Hemorrhoids Naturally

**I**mportantly, when starting treatment for a condition such as hemorrhoids, you first need to ascertain what the root cause of the condition is. A lot of the natural, holistic treatments available, focus on the root cause, not just on symptom relief. This will also lead to your own **hemorrhoids** disappearing forever, without the relapses, and that is the end goal.

Let this ex-sufferer show you how to beat Hemorrhoids, quick and naturally. <http://www.hemorrhoidreliefsecret.info>.

**Hemorrhoids** occur from veins and blood vessels that run through the rectal location. Due to human physiology, the anal circulatory blood system, works in a peculiar way. Gravity forces liquid to flow down; nevertheless, your body requires blood to be pumped back up to the heart. It is also important to note, that the anorectal canal is under constant natural pressure, simply due to your normal movement and the body's natural functions.

The blood vessels that form part of the anal muscles, that are responsible for removing waste from the anal cavity, are also working from the large **hemorrhoidal** cushions on the inside of anal canal. These particular veins have the ability to open or perhaps constrict, in order to allow flexibility and sphincter control, which we make full use of on a daily basis. They run down past the anal sphincter, right up to the exterior of the body. Then they swing back up towards the heart. This "U-turn" within the veins can be found close to the skin, this really is the location where outside hemorrhoids can develop.

## You Might Ask Why this Occurs

The particular logical trigger has as yet not really been completely clarified; nevertheless, hemorrhoids produce from extreme pressure inside the abdominal region, increasing blood pressure within the blood vessels. The blood vessels then puts force on the defensive vein walls. Although these walls poses elasticity, if they pressure exerted is too high, hemorrhoids will develop.

## The Vein Wall Stretches So Far that It Doesn't Naturally Contract, a Hemorrhoid Develops

While some hemorrhoids go away on their own, others will just grow bigger and cause more problems. You should always treat **external hemorrhoids** long before they get to a critical stage.

- Abdominal pressure can be due to constipation, pregnancy, weight problems, wearing tight clothing and chronic diarrhea.
- Colorectal conditions are also known to cause hemorrhoids.

*“ Is frightening in order to realize that the modern toilet design can be contribute to hemorrhoids developing. It only allows weak muscle support in the required position, consequently adding pressure to the arschfick canal. If you are pregnant or have a serious health problem with your large intestine, your external hemorrhoids may not clear up until the health is either gone or controlled.*

Lifestyle changes are important, therefore following a healthy diet, filled with fiber, fruit and vegetables is essential. It also ensures your stool to be loose. Drinking lots of water is very important to be able to keep your body hydrated as well as your **bowel** movements regular, preventing constipation. Educate yourself on organic holistic treatments; your body and a healthy lifestyle are the best weapons you have.
